“steel & style”
www.epika.com.tr

1969 yılında somya üretimi ile faaliyetine başlayan GÖRÜR ÇEKYAT LTD.ŞTİ. 1978 yılında kanepeler üretimi ile mobilya sektörüne girmiştir.

Türkiye ve Dünya’da ilk defa üretmiş olduğu patentli tamamı çelik iskeletleri ile tanınmaktadır. Sağlamlığı ile bilinen EPIKA markası ile 2000 yılından beri faaliyetine devam eden firmamız, üretiminin önemli bir kısmını yurt dışına ihraç etmektedir.

EPIKA markamızın en önemli özelliği müşteri memnuniyetidir.

- Patentli ve tamamı çelikten üretilmiş Türkiye’nin tek iskeleti. Çelik hafif ve sağlamdır. Elektrostatik boya sistemi ile iskeletin tamamı boyalıdır ve paslanmaya karşı maksimum koruma sağlanmıştır. Kolların içerisi de çelik iskelettir rutubet ve nemden etkilenmez.
- Kolların içerisindeki çelik iskelet; kollardaki sallanma, çökme ve kırılma gibi sorunları engeller.
- 3,8 mm çelik Zig-Zag yay; koltuk ve kanepeler üretiminde oturma kısımlarında kullanılan lastik kolon veya elastik kolon yerine Zig-Zag yay kullanılmaktadır, oturaklarda sağlamlık ve konfor sağlamaktadır.
- M2=1,1 kg sert keçe; oturma kısmında yükün eşit dağılmasını sağlar ve süngerin metalle temasını keserek süngeri korur.
- Oturaklarda 35 dansite sünger kullanılmaktadır; 35 dansite sünger, dayanıklılığı, oturma konforunu ve uzun yıllar kullanım imkanını sağlar.
- Elyaf; elyaf oturma yerinde yumuşaklık hissi uyandırır ve kumaşın deformasyonunu engeller.
- Sökülebilir kollar; sökülebilir kollar sayesinde nakliye daha kolay ve hafif hale gelir. Sökülmüş olarak taşınan kollarda nakliye aşamasında çarpma ve sürtme sonucu oluşabilecek hasarlar engellenir.
- Çelik iskelete monte edilen tüm mekanizmalar uzun yıllar sağlıklı çalışır. İskeletler metalden üretildiğinden, mekanizmalar daha sağlam zemine monte edildiği için, daha sağlıklı ve uzun yıllar arızasız çalışır.
- COMPLETE STEEL FRAME ;The STEEL in turn is light and strong. The complete frame is painted with electrostatic paint system aiming the maximum protection against rusting.
- STEEL FRAME IN THE ARMS;The steel frame in the arms prevents the shaking, dents and breaking etc. problems of the arms.
- 3,8 MM STEEL ZIG-ZAG SPRING;Rubber colons or elastic colons are used for the sitting sections of the armchairs and sofas. The replacing zig-zag spring prevents the deformation of such most easily deforming parts.
- M2=1,1 KG HARD PAD;The hard pad enables equal distribution of load on the sitting section. It prevents the contact of the sponge with the metal as to protect the latter.
- 35 DENSITY SPONGE; 35 density sponge has a quality as to provide comfort, strength and durability.
- FIBER;Fiber provides a softness feeling in the sitting section and prevents the deformation of the fabric.
- DEMOUNTABLE ARMS
The demountable arms make transport easier. Damages during transport due to impacts and contacts are prevented thanks for dismantled handling of the arms.
- ALL THE MECHANISM ASSEMBLED TO THE STEEL FRAME FUNCTION PROPERLY FOR LONG YEARS;Since the mechanisms on the frame are made up of metal, they may not deform each other to the contrary of chipboard and wood frames. This means long years of healthy functioning.

Technical drawing of a stepped L-shaped object. The overall dimensions are 407 cm in width and 362 cm in height. The object is composed of several rectangular blocks. The top horizontal section has a total width of 407 cm, with segments of 100 cm, 95 cm, 95 cm, and 117 cm. The vertical section on the left has a total height of 362 cm, with segments of 117 cm, 50 cm, 95 cm, and 100 cm. The bottom horizontal section has a width of 95 cm. The right vertical section has a height of 95 cm. The object features a diagonal cut on the top-left corner of the vertical section and a small rectangular notch in the middle of the vertical section.
